1987 ANNUAL INDEXES

Textile Research Journal

Volume 57

AUTHOR AND TITLE INDEX, pp. 744–749

MONTH	PAGES
January	1–60
February	61–122
March	123–184
April	185–246
May	247–308
June	309–370

SUBJECT INDEX, pp. 750–758

MONTH	PAGES
July	371–432
August	433–494
September	495–556
October	557–618
November	619–680
December	681–758

AUTHOR AND TITLE INDEX

Abhyankar, Prashant N. Stability of DMDHEU and Alkylated Crosslinking Finishes Towards Acidic and Alkaline Hydrolysis (*Beck, Ladisch, Bertoniere*) 395

Adams, Kurt L. In-Plane Flow of Fluids in Fabrics: Structure/Flow Characterization (*Rebenfeld*) 647

Adanur, Sabit Mechanics of a Single Nozzle Air-Jet Filling Insertion System Part III: Yarn Insertion Through Tubes (*Salama, Mohamed*) 44

Agarwal, B. R. Effect of Twist Factor and Stitch Length of Open-End Spun Cotton Yarn on Properties of Rib Knitted Fabrics (*Sharma, Gupta, Patnaik*) 73

Aggarwal, S. K. Evaluation of Classimat Faults for Their Performance in Weaving (*Hari, Subramanian*) 735

Alaiban, T. S. Mechanism of Loop Formation at Extreme Cam Settings on a Sinker Top Machine Part I: Relationship Between Count, Gauge, and Tightness Factor (*Banerjee*) 513

Mechanism of Loop Formation at Extreme Cam Settings on a Sinker Top Machine Part II: Analysis of Limiting Conditions (*Banerjee*) 568

Alston, Peter V. Deposit Generation in the Open-End Spinning of 100% Polyester Yarn 679

Arns, W. Scanning Electron Microscopic Investigations of the Breakdown of Wool by Insect Larvae (*Hammers, Zahn*) 401

Atwal, Mahabir S. Factors Affecting the Air Resistance of Nonwoven Needle-Punched Fabrics 574

Bag, S. C. Structural Features and Luster in Jute Fiber (*Ray, Das, Mukherjee*) 611

Banerjee, A. N. Graft Copolymerization of Methyl Methacrylate and Acrylamide on Cotton Yarn Using Ceric Ammonium Sulfate as an Initiator (*Das*) 740

Banerjee, P. K. Mechanism of Loop Formation at Extreme Cam Settings on a Sinker Top Machine Part I: Relationship Between Count, Gauge, and Tightness Factor (*Alaiban*) 513

Mechanism of Loop Formation at Extreme Cam Settings on a Sinker Top Machine Part II: Analysis of Limiting Conditions (*Alaiban*) 568

Barghash, Vienna A. Influence of Filling Yarn Characteristics on the Properties of Corduroy Fabrics Woven on an Air-Jet Loom (*Mohamed, Barker*) 661

Barker, Roger L. Analyzing the Transient Thermophysical Properties of Heat-Resistant Fabrics in TPP Exposures (*Lee*) 331

Influence of Filling Yarn Characteristics on the Properties of Corduroy Fabrics Woven on an Air-Jet Loom (*Mohamed, Barghash*) 661

Thermal Protective Performance of Heat-Resistant Fabrics in Various High Intensity Heat Exposures (*Lee*) 123

Bassett, D. M. Influence of Growth Period on Neps in Cotton (*Mangialardi, Lalor, Miravalle*) 421

Basu, A. K. Effect of Different Let-off Mechanisms on Fabric Formation and Dimension of Fabric in the Loom ... 379

Beck, Keith R. Stability of DMDHEU and Alkylated Crosslinking Finishes Towards Acidic and Alkaline Hydrolysis (*Abhyankar, Ladisch, Bertoniere*) 395

Bertoniere, Noelie R. Stability of DMDHEU and Alkylated Crosslinking Finishes Towards Acidic and Alkaline Hydrolysis (*Abhyankar, Beck, Ladisch*) 395

Bhattacharya, N., Interaction of Polyvinyl Pyrrolidone with Disazo Dyes (*Sheth*) 92

Bhattacharyya, N. Alkaline Hydrolysis of Mixtures of Reactive Dyes 54

Boylston, E. K. Orientation Measurements in Developing Cotton Fibers (*Hebert, Thibodeaux*) 742

Brown, Roger S. Rapidly Conditioning Laboratory Samples of Cotton 731

Bruno, Joseph S. Temperature-Adaptable Textiles Containing Durably Bound Polyethylene Glycols (*Vigo*) 427

Buchanan, D. R. Thermomechanical Analysis of the Stress History in Heat Set Nylon 6 Carpet Yarns (*Dennis*) .. 625

Caldwell, J. Recovery and Analysis by HPLC of Benzoyl Peroxide Residues in Nylon Carpet Fibers (*Perenich*) ... 346

Callaway, Brantly M. Possible Causes for Shedding of Sized Yarns on the Loom (*Hall, Mora*) 614

Cameron, B. A. Reactions of Wool with Sulfamic Acid (*Pailthorpe*) 619

Cardamone, Jeanette M. Characterizing Aged Textile Fibers by Fourier Transform Infrared Photoacoustic Spectroscopy Part I: Comparison of Artificial and Natural Ageing in Cotton (*Gould, Gordon*) 235

Carr, Christopher M. Pyrolysis Gas Chromatography of Wool Part I: Detection and Quantitation of Commercially Applied Agents (*Marmer, Magidman*) 681

Carr, C. M. An X-Ray Photoelectron and Electron Spin Resonance Study of Wool Treated with Aqueous Solutions of Chromium and Copper Ions (*Evans, Roberts*) 109

Cerniani, Ado Dyeing Kinetics and Monochlorotriazinyl Dyes for Nylon (*De Giorgi*) 563

Cardamone, Jeanette M. Characterizing Aged Textile Fibers by Fourier Transform Infrared Photoacoustic Spectroscopy Part I: Comparison of Artificial and Natural Ageing in Cotton (*Gould, Gordon*) 235

Carr, Christopher M. Pyrolysis Gas Chromatography of Wool Part I: Detection and Quantitation of Commercially Applied Agents (*Marmer, Magidman*) 681

Carr, C. M. An X-Ray Photoelectron and Electron Spin Resonance Study of Wool Treated with Aqueous Solutions of Chromium and Copper Ions (*Evans, Roberts*) 109

Cerniani, Ado Dyeing Kinetics and Monochlorotriazinyl Dyes for Nylon (*De Giorgi*) 563

Chaunis, S. An Experimental Approach to Spinning New Cellulose Fibers with N-Methylmorpholine-Oxide as a Solvent (*Loubinoux*) 61
Cheek, Lenore Effects of Mercerization, Submercerization, and Liquid Ammonia on Fiber Morphology of Neps in Cotton Fabric (*Wilcock, Hsu*) 690
Chidambareswaran, P. K. Analysis of Some Textile Blends Using Their X-Ray Diffraction Patterns (*Sreenivasan, Patil, Parthasarathy, Srinathan*) 167
Calculating Herman's Orientation Factor (*Warrier, Munshi*) 554
Quantitative Analysis of Crystalline Phases in Chemically Treated Cotton Fibers (*Sreenivasan, Patil*) 219
Crane, J. P. Rewet of Thermally Bonded Polyester Nonwovens (*Iyengar, Kwok*) 270

Dansizer, C. J. Surface Wettability Scanning of Long Filaments by a Liquid Membrane Method (*Kamath, Hornby, Weigmann*) 205
Das, B. K. Scanning Electron Microscope Observations of Nonwoven Fabrics from Jute and Other Textiles (*Debnath, Ray*) 528
Structural Features and Luster in Jute Fiber (*Bag, Ray, Mukherjee*) 611
Das, Sri R. K. Graft Copolymerization of Methyl Methacrylate and Acrylamide on Cotton Yarn Using Ceric Ammonium Sulfate as an Initiator (*Banerjee*) 740
Datta, A. K. An On-Line System for Controlling Weight Irregularities in Jute Silver (*SenGupta*) 617
Debnath, C. R. Scanning Electron Microscope Observations of Nonwoven Fabrics from Jute and Other Textiles (*Das, Ray*) 528
De Giorgi, Maria Rita Dyeing Kinetics and Monochlorotriazinyl Dyes for Nylon (*Cerniani*) 563
de Jong, S. Physical Ageing and Annealing in Fibers and Textile Materials Part IV: Ageing During Wear of Apparel Wool Fabrics (*Mahar, Dhingra, Postle*) 697
DeLuca, L. B. Comparison of Dust Contents of Six Cottons as Measured by the Cotton Particulates Analyzer and Several Other Methods 98
Determining Dust and Trash Contents of Cottons with the Cotton Particulates Analyzer Part II: Evaluation of Respirable Dust Measuring Machines and Methods 1
Dennis L. A. Thermomechanical Analysis of the Stress History in Heat Set Nylon 6 Carpet Yarns (*Buchanan*) 625
Dhara, Debasis Role of Phenol in High Temperature Dyeing of Polyester (*Gulrajani*) 155
Dhingra, R. C. Measuring and Interpreting Low-Stress Fabric Mechanical and Surface Properties Part I: Precision of Measurement (*Mahar, Postle*) 357
Physical Ageing and Annealing in Fibers and Textile Materials Part II: Annealing Behavior of Textile Materials Produced from Wool and Manmade Fibers (*Sukigara, Postle*) 479
Physical Ageing and Annealing in Fibers and Textile Materials Part III: Physical Ageing and Annealing in Blended Textile Assemblies (*Tao, Sukigara, Postle*) 601
Physical Ageing and Annealing in Fibers and Textile Materials Part IV: Ageing During Wear of Apparel Wool Fabrics (*Mahar, de Jong, Postle*) 697
Duckett, K. E. An Examination of the Fibrogram (*Krowicki*) 200
Dutta, A. Role of Quench Air Profiles in Multifilament Melt Spinning of PET Fibers 13

El-Dessouki, T. Structural Parameters of Polyester Fibers from an Egyptian Manufacturer (*Hamza*) 508
Etters, J. N. Inducing and Measuring Particulate Migration 274
Evans, J. C. An X-Ray Photoelectron and Electron Spin Resonance Study of Wool Treated with Aqueous Solutions of Chromium and Copper Ions (*Carr, Roberts*) 109

Farnworth, Brian Comments on "Heat Transfer Characteristics of Nonwoven Insulating Materials" 615
Foulds, Roger A. Decision Schemes for Assessing Dark Fiber Concentration in Top (*Turner*) 710
Freeman, H. S. Photolytic Behavior of Some Popular Disperse Dyes on Polyester and Nylon Substrates (*Hsu*) 223
Frydrych, I. A Method of Predicting the Strength and Breaking Strain of Cotton Yarn (*Żurek, Zakrzewski*) 439
Fujii, Tomiko Repellency of Textile Assemblies Part I: Apparent Contact Angle of Wax-Coated Monofilament Mesh Screen (*Kawase, Minagawa*) 185
Repellency of Textile Assemblies Part II: Apparent Contact Angle of Fresh Monofilament Mesh Screen (*Kawase, Minagawa*) 686

Gale, Douglas J. Detection of Desmosterol in the Internal Lipids of Wool Fibers (*Logan, Rivett*) 539
Garcia, M. Relationship Between Triboelectric Charging and Surface Modification of Human Hair: Polymeric Versus Monomeric Long Alkyl Chain Quaternary Ammonium Salts (*Jachowicz, Wis-Surel*) 543
Gonzales, Elwood J. Foam Finishing Treatment of Cotton Fabrics with Formaldehyde Part II: Formaldehyde Properties (*Reinhardt*) 113
Gordon, S. H. Characterizing Aged Textile Fibers by Fourier Transform Infrared Photoacoustic Spectroscopy Part I: Comparison of Artificial and Natural Ageing in Cotton (*Cardamone, Gould*) 235
Goynes, Wilton R. Effects of Heat on Structures of Cotton, Polyester, and Wool Fibers in a Triblended Fabric With and Without Flame Retardant (*Trask*) 549
Gould, J. Michael Characterizing Aged Textile Fibers by Fourier Transform Infrared Photoacoustic Spectroscopy Part I: Comparison of Artificial and Natural Ageing in Cotton (*Cardamone, Gordon*) 235
Gulrajani, M. L. Kinetics of Bleaching Agent Decomposition in a Single-Stage Preparatory Process Part II: Sodium Hypochlorite Bleaching (*Sukumar*) 105
Reply to "Comments on 'Optimization of a Single-Stage Preparatory Process for Cotton Using Sodium Hypochlorite' " 243
Role of Phenol in High Temperature Dyeing of Polyester (*Dhara*) 155
Gupta, Narender Kumar Effect of Twist Factor and Stitch Length of Open-End Spun Cotton Yarn on Properties of Rib Knitted Fabrics (*Sharma, Agarwal, Patnaik*) .. 73

Hall, David M. Possible Causes for Shedding of Sized Yarns on the Loom (*Mora, Callaway*) 614
Hammers, Ingrid Scanning Electron Microscopic Investigations of the Breakdown of Wool by Insect Larvae (*Arns, Zahn*) 401
Hamza, A. A. Structural Parameters of Polyester Fibers from an Egyptian Manufacturer (*El-Dessouki*) 508
Han, Liyuan Changes in Fine Structure and Dyeing Behavior of Nylon 6, Nylon 66, and PET Fibers Treated with Superheated Steam (*Wakida, Takagishi*) 519
Hari, P. K. Effect of Fiber/Yarn Variables on Mechanical Properties of Spliced Yarn (*Kaushik, Sharma*) 490
Evaluation of Classimat Faults for Their Performance in Weaving (*Aggarwal, Subramanian*) 735
Performance of Spliced Yarn in Warping and Weaving (*Kaushik, Sharma, Sarkar*) 670

Harper, Robert J. Jr. Influence of Repeated Laundering on Air Permeability of Core-Yarn Fabrics (*Ruppenicker*) 674
Woven Fabrics Prepared from High Tenacity Cotton/Polyester Core Yarn (*Ruppenicker*) 147
Hatch, Kathryn L. Fabric-Caused Changes in Human Skin: *In Vivo* Stratum Corneum Water Content and Water Evaporation (*Wilson, Maibach*) 583
Hearle, J. W. S. Tensile Properties of Twisted para-Aramid Fibers (*Zhou*) 7
Hebert, J. J. Orientation Measurements in Developing Cotton Fibers (*Boylston, Thibodeaux*) 742
Hiramatsu, Takashi Comparing Potential Energy Between Fibers and Particulate Soil with Dynamic Energy from Liquid Flow and Their Effects on Detergency (*Kotani*) 142
Hornby, S. Surface Wettability Scanning of Long Filaments by a Liquid Membrane Method (*Kamath, Dansizer, Weigmann*) 205
Hsieh, You-Lo Bacterial Adherence on Fabrics by a Radioisotope Labeling Method (*Timm, Merry*) 20
Hsu, Li-Hua Effects of Mercerization, Submercerization, and Liquid Ammonia on Fiber Morphology of Neps in Cotton Fabric (*Cheek, Wilcock*) 690
Hsu, W. N. Photolytic Behavior of Some Popular Disperse Dyes on Polyester and Nylon Substrates (*Freeman*) 223
Hussain, G. F. S. Extension Due to Chain Slippage in Textile Fibers (*Nachane*) 592
Yarn Bundle Strength from Single Strand Test Data (*Nachane, Krishna Iyer*) 122

Igwe, Godwin-Joseph I. Microscopical Examination and Measurement of Felting Needles for Gas and Dust Filtration (*Smith*) 677
Inagaki, Hiroshi States of Water Sorbed on Wool as Studied by Differential Scanning Calorimetry (*Sakabe, Ito, Miyamoto*) 66
Ito, Hiraku States of Water Sorbed on Wool as Studied by Differential Scanning Calorimetry (*Sakabe, Miyamoto, Inagaki*) 66
Iyengar, Y. Comments on "Effect of Gamma Radiation Sterilization on Nonwovens for Medical End Uses" 184
Correlation of Fabric Rewet with Wet-Through Resistance Profile During Liquid Flow 120
Rewet of Thermally Bonded Polyester Nonwovens (*Kwok, Crane*) 270

Jachowicz, J. Relationship Between Triboelectric Charging and Surface Modification of Human Hair: Polymeric Versus Monomeric Long Alkyl Chain Quaternary Ammonium Salts (*Garcia, Wis-Surel*) 543
Jaganathan, K. Abrasion Resistance of Ring and Rotor Spun Yarns in Relation to Their Coefficient of Friction (*Subramaniam, Nalankilli, Mathivanan*) 369

Kadikis, Ausma Comments on "Quantitative Fiber Mixture Analysis by Scanning Electron Microscopy" 676
Kalyanaraman, A. R. A Method to Measure Static and Kinetic Friction of Yarns (*Prakasam*) 307
Kamath, Y. K. Surface Wettability Scanning of Long Filaments by a Liquid Membrane Method (*Dansizer, Hornby, Weigmann*) 205
Kaushik, R. C. D. Effect of Fiber/Yarn Variables on Mechanical Properties of Spliced Yarn (*Sharma, Hari*) 490
Performance of Spliced Yarn in Warping and Weaving (*Hari, Sharma, Sarkar*) 670
Kawase, Tokuzo Repellency of Textile Assemblies Part I: Apparent Contact Angle of Wax-Coated Monofilament Mesh Screen (*Fujii, Minagawa*) 185
Repellency of Textile Assemblies Part II: Apparent Contact Angle of Fresh Monofilament Mesh Screen (*Fujii, Minagawa*) 686
Kimura, Michiko Effect of Zeolite on the Dispersion Stability of Particles (*Komaki, Nakajima*) 82
Komaki, Motoko Effect of Zeolite on the Dispersion Stability of Particles (*Kimura, Nakajima*) 82
Kotani, Akiko Comparing Potential Energy Between Fibers and Particulate Soil with Dynamic Energy from Liquid Flow and Their Effects on Detergency (*Hiramatsu*) 142
Kottes Andrews, B. A. Agent and Finish Stability in Durable Press Processing of Cotton Fabrics Indicated by Formaldehyde Release (*Reinhardt*) 596
Cotton/Milkweed Blends: A Novel Textile Product (*Louis*) 339
1,3,-Dioxolane, An Alternative to Formalin as a Standard for Formaldehyde 705
Thermal Response of Cotton Finishes from Methylolamide Agents (*Reinhardt*) 161
Krishna Iyer, K. R. Yarn Bundle Strength from Single Strand Test Data (*Nachane, Hussain*) 122
Yarn Tension as a Function of Extension: A New Approach (*Nachane*) 279
Krowicki, R. S. An Examination of the Fibrogram (*Duckett*) 200
Kundu, S. K. Flexural Bending Fatigue of Raw and Chemically Treated Jute 118
Kwok, W. K. Rewet of Thermally Bonded Polyester Nonwovens (*Iyengar, Crane*) 270

Ladisch, Christine M. Stability of DMDHEU and Alkylated Crosslinking Finishes Towards Acidic and Alkaline Hydrolysis (*Abhyankar, Beck, Bertoniere*) 395
Laing, R. M. Micro Software Development Aids Elucidating Tensile Behavior of the Lockstitch Seam (*Pearshouse*) 256
Lalor, W. F. Influence of Growth Period on Neps in Cotton (*Mangialardi, Bassett, Miravalle*) 421
Lamb, George E. R. Cleaning of Fabric Filters 472
Measurement of Thermal Conductivity of Nonwovens Using a Dynamic Method (*Martin*) 721
Lee, Young Moo Analyzing the Transient Thermophysical Properties of Heat-Resistant Fabrics in TPP Exposures (*Barker*) 331
Thermal Protective Performance of Heat-Resistant Fabrics in Various High Intensity Heat Exposures (*Barker*) 123
Leeder, J. D. Studies of Wrinkling Properties of Wool Fabrics Part VII: Wrinkling at Low Humidities (*Shishoo*) 430
Levene, R. Surface Whitened, Shrink Resistant Wool Cloth of Improved Lightfastness 298
Li, Fantin Relation Between Microporous Structure of PAC/AS Blend Fibers and Sequence Distribution of AS Copolymers (*Qin, Liu, Yang, Mao*) 433
Liu, Zhaofeng Relation Between Microporous Structure of PAC/AS Blend Fibers and Sequence Distribution of AS Copolymers (*Qin, Yang, Mao, Li*) 433
Logan, Raymond I. Detection of Desmosterol in the Internal Lipids of Wool Fibers (*Gale, Rivett*) 539
Lord, Peter R. Problems and Possibilities in Sliver Monitoring 171
Loubinoux, D. An Experimental Approach to Spinning New Cellulose Fibers with N-Methylmorpholine-Oxide as a Solvent (*Chaunis*) 61

SUBJECT INDEX

Abrasion
- **of five different cottons:** also mechanical and aesthetic properties: appraisal of performance *Ukponmwan* 445
- **of nylon and polyester marine ropes:** wet and dry test data *Mandell* 318
- **resistance of ring and rotor spun yarns:** relation to their coefficient of friction *Subramanian, Nalankilli, Mathivanan, Jaganathan* 369

Acetate
- **fabric-caused changes in human skin:** *in vivo* stratum corneum water content and water evaporation *Hatch, Wilson, Maibach* 583

Acrylics
- **physical ageing and annealing in:** study of wool and manmade fabrics: de-ageing in water *Sukigara, Dhingra, Postle* 479
- **porous water-retentive fibers:** relation between microporous structure of PAC/AS blend fibers and sequence distribution of AS copolymers *Qin, Liu, Yang, Mao, Li* 433

Ageing
- **effect on torsional damping of wool fibers:** also effects of humidity, annealing and tensile loads *Phillips* 415
- **natural and artificial ageing in cotton:** Fourier transform infrared photoacoustic spectroscopy *Cardamone, Gould, Gordon* 235
- **physical ageing and annealing in wool fibers:** in single wool fibers and textile assemblies *Tao, Postle* 387
- **physical ageing and annealing in fibers and textiles:** annealing behavior of textiles from wool and manmade fibers: de-ageing in water *Sukigara, Dhingra, Postle* 479
- **physical ageing and annealing in wool blends:** effects on stress relaxation behavior: viscoelastic properties *Tao, Sukigara, Postle, Dhingra* 601
- **of apparel wool fabrics during wear:** study of trousers: physical ageing and annealing in fibers and textile materials *Mahar, de Jong, Dhingra, Postle* 697

Aramids
- **twisted para-aramid fibers:** tensile properties of Kevlar *Hearle, Zhou* 7

Bacteria
- **adherence on fabrics:** a radioisotope labeling method *Hsieh, Timm, Merry* 20

Bending
- **flaw in Shirley stiffness tester:** comments on *Rao, Talele, Mehta* 556
- **flexural fatigue of jute:** raw and chemically treated *Kundu* 118
- **stress relaxation of apparel wool fabrics:** physical ageing and annealing in fibers and textile materials: wear tests of trousers *Mahar, de Jong, Dhingra, Postle* 697

Birefringence
- **of Egyptian polyester fibers:** morphological and structural parameters *Hamza, El-Dessouki* 508

Bleaching
- **sodium hypochlorite bleaching:** kinetics of bleaching agent decomposition in a single-stage preparatory process *Sukumar, Gulrajani* 105
- **sodium hypochlorite on cotton:** optimization of a single-stage preparatory process: comments on *Whitwell* 239
- **sodium hypochlorite on cotton:** optimization of a single-stage preparatory process: reply to comments *Gulrajani* 243

Byssinosis
- **aerodynamic removal of native cotton dust:** theoretical model *Montalvo* 133
- **cotton particulates analyzer:** determining dust and trash contents: evaluation of respirable dust measuring machines and methods *DeLuca* 1
- **dust contents of six different cottons:** comparison of measurements from cotton particulates analyzer and several other methods *DeLuca* 98

Capillarity
- **of fabrics in dyeing:** inducing and measuring particulate migration *Etters* 274
- **repellency of textile assemblies:** apparent contact angle of wax-coated monofilament mesh screen *Kawase, Fujii, Minagawa* 185
- **repellency of textile assemblies:** apparent contact angle of fresh monofilament mesh screen *Kawase, Fujii, Minagawa* 686

Carbonization
- **damage to wool during:** a rapid and sensitive method for evaluating *Wang, Pailthorpe* 728
- **of wool fibers:** critical concentration of sulfuric acid and its effect on wool *Zhao, Pailthorpe* 39
- **of wool fibers:** surface barrier effects in rapidly carbonized wool *Zhao, Pailthorpe* 579
- **rapid carbonizing of wool:** effects of time delay *Zhao, Pailthorpe* 523

Carpets
- **chemical discoloration of nylon carpets:** recovery and analysis by HPLC of benzoyl peroxide residues on carpet fibers *Caldwell, Perenich* 346
- **heat set nylon 6 carpet yarns:** thermomechanical analysis of stress history *Dennis, Buchanan* 625
- **wool carpet yarns:** nonylphenol poly(ethylene oxide) surfactant solution: transport in *Trounson, McLaughlin* 309

Cashmere
- **fine structure of fibers:** also superfine Merino wool *Tester* 213

Catalysts
- **highly active mixed catalyst system:** durable press cotton production: better tensile properties *Pandey, Raje* 265
- **low, medium, and high temperature:** formaldehyde-free durable press finishing of cotton by glyoxal-glycol process *Welch, Peters* 351

Cellulose
- **in chemically treated cotton fibers:** quantitative analysis of crystalline phases *Chidambareswaran, Sreenivasan, Patil* 219
- **spinning new fibers:** experimental approach with N-methylmorpholine-oxide as a solvent *Loubinoux, Chaunis* 61

Chromatography
- **high performance liquid chromatography:** recovery and analysis of benzoyl peroxide residues in nylon carpet fibers *Caldwell, Perenich* 346
- **HPLC study of internal lipids of wool:** detection of desmosterol *Gale, Logan, Rivett* 539
- **pyrolysis gas chromatography:** to detect commercially applied insect-resist treatments and yellow dyes *Marmer, Magidman, Carr* 681

Cleaning
- **of fabric bag filters:** study of pulse jet, reverse air, electrostatic, and bag shearing cleaning methods *Lamb* 472

Clothing
- **ageing during wear of apparel wool fabrics:** study of trousers: physical ageing and annealing in fibers and textile materials *Mahar, de Jong, Dhingra, Postle* 697
- **lockstitch seams in:** micro software development aids elucidating tensile behavior *Laing, Pearshouse* 256

Clothing, Protective
transient thermophysical properties of: heat resistant fabrics in thermal protective performance exposures *Barker, Lee* 331
21 heat-resistant fabrics: thermal protective performance in various high intensity heat exposures *Lee, Barker* 123
Comfort
fabric-caused changes in human skin: *in vivo* stratum corneum water content and water evaporation *Hatch, Wilson, Maibach* 583
Computer Techniques
automated digital analysis of fiber interferograms: data on Kevlar, nylon, PET, and glass fibers *Roche, Rubin, Van Kavelaar* 371
for predicting strength and breaking strain: study of cotton yarns *Żurek, Frydrych, Zakrzewski* 439
micro software development aids: to determine tensile behavior of the lockstitch seam *Laing, Pearshouse* .. 256
Contaminants
bacterial adherence on fabrics: radioisotope labeling method *Hsieh, Timm, Merry* 20
of cotton: comparison of dust contents of six cottons as measured by the cotton particulates analyzer and several other methods *DeLuca* 98
Copolymers
blended with acrylics to make PAC/AS fibers: relation between microporous structure and sequence distribution of AS copolymers *Qin, Liu, Yang, Mao, Li* 433
Cotton
and polyester slivers: problems and possibilities in monitoring *Lord* 171
neps in ginned lint, yarn, fabric: influence of growth period *Mangialardi, Lalor, Bassett, Miravalle* 421
Cotton Dust
aerodynamic removal of: theoretical model *Montalvo* 133
determining dust and trash contents: cotton particulates analyzer: evaluation of respirable dust measuring machines and methods *DeLuca* 1
from six different cottons: comparison of measurements from cotton particulates analyzer and several other methods *DeLuca* 98
Cotton Fabrics
appraisal of quality: abrasion resistance, mechanical and aesthetic properties: also polyester and wool *Ukponmwan* 283
appraisal of performance of five different cottons: study of abrasion, mechanical and aesthetic properties *Ukponmwan* 445
cotton and milkweed blends: study of knitted blends *Louis, Kottes Andrews* 339
cotton-polyester core-yarn fabrics: influence of repeated laundering on air permeability *Harper, Ruppenicker* 674
cotton-polyester-wool triblend: effect of heat on structures with and without flame retardant: SEM study *Goynes, Trask* 549
detergency study: distribution of natural soils on shirt collars: SEM study of cotton and polyester fabrics *Obendorf, Webb* 557
DP finishing of: stability of DMDHEU and alkylated crosslinking finishes towards acidic and alkaline hydrolysis *Abhyankar, Beck, Ladisch, Bertoniere* .. 395
DP processing of: agent and finish stability indicated by formaldehyde release *Reinhardt, Kottes Andrews* .. 596
durable press: formaldehyde-free finishing by glyoxal-glycol process: low, medium, high temperature catalysts *Welch, Peters* 351
durable press: produced with highly active mixed catalyst system: better tensile properties *Pandey, Raje* ... 265
finished with methylolamide agents: thermal response and formaldehyde content and release *Reinhardt, Kottes Andrews* 161
foam finished with formaldehyde: fractional factorial design of experiments to study released and bound formaldehyde *Gonzales, Reinhardt* 113
from cotton/polyester core yarn: woven with high tenacity yarn *Harper, Ruppenicker* 147
knits made on a sinker top machine: mechanism of loop formation at extreme cam settings: relationship between count, gauge, and tightness factor *Banerjee, Alaiban* 513
knits made on a sinker top machine: mechanism of loop formation at extreme cam settings: theoretical analysis of limiting conditions *Banerjee, Alaiban* 568
moisture induced changes in structure: air permeability measurements: also wool, polyester *Wehner, Miller, Rebenfeld* 247
neps in: effects of mercerization, submercerization, and liquid ammonia on fiber morphology of neps *Cheek, Wilcock, Hsu* 690
sodium hypochlorite bleaching of: kinetics of bleaching agent decomposition in a single-stage preparatory process *Sukumar, Gulrajani* 105
sodium hypochlorite bleaching of: optimization of a single-stage preparatory process: comments on *Whitwell* 239
sodium hypochlorite bleaching of: optimization of a single-stage preparatory process: reply to comments *Gulrajani* 243
temperature adaptable textiles: containing durably bound polyethylene glycols *Vigo, Bruno* 427
upholstery prints: results of a consumer wear study *Warfield* 192
wool/cotton blends: improving wrinkle recovery by simultaneous treatment with Synthappret BAP and DMDHEU *Rippon* 655
Cotton Fibers
analysis by fibrogram: theoretical study of fiber length *Krowicki, Duckett* 200
artificially and naturally aged: characterized by Fourier transform infrared photoacoustic spectroscopy *Cardamone, Gould, Gordon* 235
crystalline phases in chemically treated fibers: quantitative analysis *Chidambareswaran, Sreenivasan, Patil* ... 219
Herman's orientation factor: crystallite orientation distribution profile of x-ray reflection *Warrier, Munshi, Chidambareswaran* 554
moisture on fibers during ginning: analysis and mathematical modeling of an on-line measuring system *Wilkes, Waldie* 29
orientation measurements in developing fibers: x-ray angles and optical orientation angles *Hebert, Boylston, Thibodeaux* 742
rapidly conditioning lab samples: 14 cottons tested for length, strength, moisture content *Brown* 731
soil removal from: comparison of various detergents: distribution of natural residual soils *Webb, Obendorf* 640
Cotton Yarns
grafting copolymers on yarns: methyl methacrylate and acrylamide using ceric ammonium sulfate as an initiator *Das, Banerjee* 740
mercerized and crosslinked: effect of stretch during mercerization on physical properties and degradation *Pandey, Nair* 532
performance of Classimat faults in weaving: evaluation of magnitude of faults and effect of sizing on them *Aggarwal, Hari, Subramanian* 735
rib knitted fabrics from: effect of twist factor and stitch length of open-end spun yarn on fabric properties *Sharma, Gupta, Agarwal, Patnaik* 73

strength and breaking strain of: method of predicting based on linear density, length, strain, stress: microcomputer technique *Żurek, Frydrych, Zakrzewski* 439
woven into corduroy on an air-jet loom: influence of filling yarn characteristics on fabric properties *Mohamed, Barghash, Barker* 661
Crosslinking
DMDHEU and alkylated crosslinking finishes: stability towards acidic and alkaline hydrolysis *Abhyankar, Beck, Ladisch, Bertoniere* 395
for formaldehyde-free durable press finishing: low, medium, high temperature catalysts: glyoxal-glycol process *Welch, Peters* 351
Crystallinity
phases in chemically treated cotton: quantitative analysis *Chidambareswaran, Sreenivasan, Patil* 219

Deformation
torsional damping of wool fibers: effects of humidity, ageing, annealing, and tensile loads *Phillips* 415
Detergents
zeolite as a substitute for sodium tripolyphosphate: effect on dispersion stability of particulate soils: biologically inactive *Kimura, Komaki, Nakajima* 82
Detergency
comparison of laundry detergents: distribution of natural residual soils on facial wipes *Webb, Obendorf* 640
distribution of natural soils on shirt collars: SEM study of cotton and polyester fabrics *Obendorf, Webb* 557
theoretical study: comparing potential energy between fibers and particulate soil with dynamic energy from liquid flow and their effects on detergency *Hiramatsu, Kotani* 142
Differential Scanning Calorimetry
study of water sorbed by wool: histological components and effect of polar groups *Sakabe, Ito, Miyamoto, Inagaki* 66
Durable Press
agent and finish stability in: indicated by formaldehyde release of cotton fabrics *Reinhardt, Kottes Andrews* 596
cottons from highly active mixed catalyst system: better tensile properties *Pandey, Raje* 265
DMDHEU and alkylated crosslinking finishes: stability towards acidic and alkaline hydrolysis *Abhyankar, Beck, Ladisch, Bertoniere* 395
formaldehyde-free finishing: glyoxal-glycol process: low, medium, high temperature catalysts *Welch, Peters* 351
1,3,-dioxolane, an alternative to formalin: as a standard for formaldehyde: four precursors investigated *Kottes Andrews* 705
Dyeing
dyeing behavior of fibers treated with superheated steam: changes in fine structure of nylon 6, 66, and PET fibers *Han, Wakida, Takagishi* 519
dye-resist treatment of wool: reactions with sulfamic acid: yellowness and strength measured *Cameron, Pailthorpe* 619
effect on sorption of water vapor: sorption isotherms determined for wool fabrics *Włochowicz, Wojciechowska-Bujok* 503
high temperature dyeing of polyester: role of phenol with disperse dyes *Dhara, Gulrajani* 155
of nylon: kinetics of monochlorotriazinyl dyes *De Giorgi, Cerniani* 563
of rapidly carbonized wool: surface barrier effects *Zhao, Pailthorpe* 579
reactive dyes: alkaline hydrolysis of mixtures *Bhattacharyya* 54
streaks caused by: a theoretical model for predicting and controlling intensity *Makansi* 463
streaks caused by: experimental section: tests on nylon knits *Makansi* 495
Dyes
detection on wool by pyrolysis gas chromatography: also insect-resist treatments *Marmer, Magidman, Carr* 681
disazo: interaction with polyvinyl pyrrolidone *Sheth, Bhattacharya* 92
disperse dyes on polyester and nylon: *photolytic behavior Freeman, Hsu* 223
particulate migration of: inducing and measuring *Etters* 274

Elasticity
viscoelastic properties of wool keratin: physical ageing and annealing in single wool fibers and textile assemblies *Tao, Postle* 387
viscoelastic properties of wool blends: physical ageing and annealing in fibers and textile assemblies: effects on stress relaxation behavior *Tao, Sukigara, Postle, Dhingra* 601
Electron Spin Resonance
and x-ray photoelectron study: wool treated with aqueous solutions of chromium and copper ions *Carr, Evans, Roberts* 109
Electrostatics
used to clean fabric bag filters: study of pulse jet, reverse air, electrostatic, and bag shearing cleaning methods *Lamb* 472
Environmental Impacts
of detergents: effect of zeolite on dispersion stability of particulate soils: biologically inactive *Kimura, Komaki, Nakajima* 82
of solvents used in spinning new cellulose fibers: experimental approach with N-methylmorpholine-oxide as a solvent *Loubinoux, Chaunis* 61

Fabric Geometry
effect of let-off mechanisms on: fabric formation and dimension of fabric in the loom *Basu* 379
Fabric Properties
appraisal of woven fabric quality: cotton, polyester, wool: abrasion resistance, mechanical and aesthetic properties *Ukponmwan* 283
of five different cottons: abrasion, mechanical and aesthetic properties: appraisal of performance *Ukponmwan* 445
Fabrics
cotton upholstery prints: results of a consumer wear study *Warfield* 192
Fatigue
of marine ropes: wet and dry test data for nylon and polyester ropes *Mandell* 318
of raw and chemically treated jute: flexural bending fatigue *Kundu* 118
Fibrogram
an examination: theoretical study of fiber length *Krowicki, Duckett* 200
Fibrous Materials
in plane fluid flow in: structure/flow characterization *Adams, Rebenfeld* 647
Filtration
cleaning of fabric bag filters: study of pulse jet, reverse air, electrostatic, and bag shearing cleaning methods *Lamb* 472
felting needles for gas and dust filtration: microscopical examination and measurement *Igwe, Smith* 677
Finishing
of cotton with methylolamide agents: thermal response of finishes: formaldehyde content and release *Reinhardt, Kottes Andrews* 161

Finishing Agents
distribution on long filaments: surface wettability scanning by a liquid membrane method *Kamath, Dansizer, Hornby, Weigmann* 205
1,3,-dioxolane, an alternative to formalin: as a standard for formaldehyde: four precursors investigated *Kottes Andrews* 705
Flammability
of 21 heat-resistant fabrics: thermal protective performance in various high intensity heat exposures *Lee, Barker* 123
Flame Resistance
of cotton-polyester-wool triblend: effect of heat on structures with and without flame retardant: SEM study *Goynes, Trask* 549
of protective clothing: transient thermophysical properties of heat resistant fabrics in thermal protective performance exposures *Barker, Lee* 331
Fluid Flow
in-plane flow in fabrics: structure/flow characterization *Adams, Rebenfeld* 647
Foams
in finishing treatment of cotton fabrics: formaldehyde properties: fractional factorial design of experiments *Gonzales, Reinhardt* 113
Formaldehyde
on cottons finished with methylolamide agents: thermal response of finishes *Reinhardt, Kottes Andrews* ... 161
1,3-dioxolane, an alternative to formalin: as a standard for formaldehyde: four precursors investigated *Kottes Andrews* 705
relationship between content and tenacity: study of stretch mercerized and crosslinked cotton yarns *Pandey, Nair* 532
release as an indicator of agent and finish stability: durable press processing of cotton fabrics *Reinhardt, Kottes Andrews* 596
released and bound on cotton fabrics: foam finishing treatment: fractional factorial design of experiments *Gonzales, Reinhardt* 113
release from DMDHEU and alkylated crosslinking finishes: stability of finishes towards acidic and alkaline hydrolysis *Abhyankar, Beck, Ladisch, Bertoniere* .. 395
Friction
static and kinetic: a method to measure in yarns *Kalyanaraman, Prakasam* 307

Gamma Radiation
for sterilization of nonwovens: medical end uses: comments on *Iyengar* 184
Geotextiles
in-plane fluid flow: structure/flow characterization in fibrous webs *Adams, Rebenfeld* 647
Ginning
measuring cotton moisture during: analysis and mathematical modeling of an on-line measuring system *Wilkes, Waldie* 29
Grafting
copolymers on cotton: methyl methacrylate and acrylamide on yarn using ceric ammonium sulfate as an initiator *Das, Banerjee* 740

Hair
triboelectric charging of: surface modification of: polymeric versus monomeric long alkyl chain quaternary ammonium salts *Jachowicz, Garcia, Wis-Surel* ... 543
Hand
of cashmere and superfine Merino: fine structure of fibers *Tester* 213
of five different cottons: appraisal of performance: also abrasion, mechanical properties *Ukponmwan* 445
Heat Resistance
of protective clothing: analyzing transient thermophysical properties in thermal protective performance exposures *Barker, Lee* 331
Heat Transfer
of nonwoven insulating materials: comments on *Farnworth* 615
of nonwoven insulating materials: measurement of thermal conductivity using a dynamic method *Martin, Lamb* 721
Humidity
effect on wrinkling of wool fabrics: studies at low humidities *Leeder, Shishoo* 430
Hydrolysis
alkaline: of mixtures of reactive dyes *Bhattacharyya* .. 54

Infrared
Fourier transform infrared photoacoustic spectroscopy: comparison of artificial and natural ageing in cotton *Cardamone, Gould, Gordon* 235
spectrophotometry of ramie: alkali treated degummed fibers *Sao, Mathew, Ray* 407
Insectproofing
detection on wool by pyrolysis gas chromatography: also yellow dye *Marmer, Magidman, Carr* 681
of wool fabrics: SEM investigations of the breakdown of wool by insect larvae *Hammers, Arns, Zahn* 401
Insulating Materials
nonwovens: heat transfer characteristics of: comments on *Farnworth* 615
nonwovens: measurement of thermal conductivity using a dynamic method *Martin, Lamb* 721
Interferometry
automated digital analysis of: data for nylon, PET, Kevlar, and glass fibers *Roche, Rubin, Van Kavelaar* 371
of polyester fibers: morphological and structural parameters of Egyptian fibers *Hamza, El-Dessouki* 508

Jute
flexural bending fatigue of: raw and chemically treated *Kundu* 118
SEM studies of nonwovens: also coir, goat hair, wool, viscose, polypropylene, and acrylic fibers *Das, Debnath, Ray* 528
structural features and luster: microscopy and diffractometry studies *Bag, Ray, Das, Mukherjee* 611
weight irregularities in sliver: an on-line system for control *Datta, SenGupta* 617

Keratin
dyeing of fibers: effect on sorption of water vapor by wool *Włochowicz, Wojciechowska-Bujok* 503
triboelectric charging of human hair: surface modification: polymeric versus monomeric long alkyl chain quaternary ammonium salts *Jachowicz, Garcia, Wis-Surel* 543
wool keratin composite: physical ageing and annealing in single wool fibers and textile assemblies *Tao, Postle* 387
Kinetics
dyeing kinetics: monochlorotriazinyl dyes for nylon *De Giorgi, Cerniani* 563
of sodium hypochlorite decomposition: single-stage preparatory process for bleaching cotton fabrics *Sukumar, Gulrajani* 105

Knitted Fabrics
from cotton and milkweed blends: various blend proportions analyzed *Louis, Kottes Andrews* 339
from open-end spun cotton yarn: effect of twist factor and stitch length on properties of rib knits *Sharma, Gupta, Agarwal, Patnaik* 73
Knitting
on a sinker top machine: mechanism of loop formation at extreme cam settings: relationship between count, gauge, and tightness factor *Banerjee, Alaiban* 513
on a sinker top machine: mechanism of loop formation at extreme cam settings: theoretical analysis of limiting conditions *Banerjee, Alaiban* 568

Laundering
comparison of detergents: distribution of natural residual soils on facial wipes *Webb, Obendorf* 640
influence on air permeability: study of cotton-polyester core-yarn fabrics *Harper, Ruppenicker* 674
Lightfastness
of shrink resistant wool: surface whitened *Levene* 298
Liquid Flow
dynamic energy from and effects on detergency: comparison with potential energy between fibers and particulate soil: theoretical study *Hiramatsu, Kotani* 142
fabric rewetting: correlation with wet-through resistance profile during liquid flow *Iyengar* 120
in textile assemblies: apparent contact angle of wax-coated monofilament mesh screen *Kawase, Fujii, Minagawa* 185
in textile assemblies: apparent contact angle of fresh monofilament mesh screen *Kawase, Fujii, Minagawa* 686
surface wettability scanning: liquid membrane method: long filaments *Kamath, Dansizer, Hornby, Weigmann* 205
surfactant solution transport in wool carpet yarns: nonylphenol poly(ethylene oxide) surfactants *Trounson, McLaughlin* 309
Looms
air-jet design: mechanics of a single nozzle insertion system: yarn insertion through tubes *Salama, Adanur, Mohamed* 44
air-jet type: influence of filling yarn characteristics on the properties of corduroy fabrics woven on an air-jet loom *Mohamed, Barghash, Barker* 661
let-off mechanisms of: effect on fabric formation and dimension of fabric in the loom *Basu* 379
shedding of sized yarns on a loom: possible causes *Hall, Mora, Callaway* 614
Luster
of jute: also structural features: microscopy and diffractometry studies *Bag, Ray, Das, Mukherjee* 611

Mathematical Analysis
and modeling of moisture on cotton: an on-line measuring system for use during ginning *Wilkes, Waldie* 29
for assessing dark fiber concentration in wool top: decision schemes *Turner, Foulds* 710
model to predict fabric streaks: perception and control of bulk, luster, and dye streaks *Makansi* 463
of cotton dust removal: aerodynamic method of removing native dust *Montalvo* 133
of detergency: comparing potential energy between fibers and particulate soil with dynamic energy from liquid flow *Hiramatsu, Kotani* 142
of extension due to chain slippage: differences in dynamic and static moduli of viscose, polyester, and nylon yarns *Nachane, Hussain* 592
of yarn tension as a function of extension: theoretical approach *Nachane, Krishna Iyer* 279
Mechanical Properties
and low-stress fabric surface properties: precision of measurement of tensile, shear, bending, compression, friction, topography *Mahar, Dhingra, Postle* 357
of cotton yarns: method of predicting strength and breaking strain: microcomputer technique *Żurek, Frydrych, Zakrzewski* 439
of five different cottons: also abrasion and aesthetic properties: appraisal of performance *Ukponmwan* ... 445
of physically aged and annealed wool: single wool fibers and textile assemblies *Tao, Postle* 387
of spliced yarn: effect of fiber/yarn variables *Kaushik, Sharma, Hari* 490
Melt Spinning
of PET multifilament fibers: role of quench air profiles *Dutta* 13
Mercerization
cotton yarns stretched during: effect on physical properties and degradation of crosslinked yarns *Pandey, Nair* 532
effect on fiber morphology of neps in cotton fabric: also submercerization and liquid ammonia *Cheek, Wilcock, Hsu* 690
Migration
in dyeing: inducing and measuring particulate migration *Etters* 274
Moisture
in rapidly conditioned cotton samples: 14 cottons tested for length, strength, moisture content *Brown* 731
Moisture Transfer
air permeability measurements: changes in fabric structure induced by moisture *Wehner, Miller, Rebenfeld* ... 247
fabric-caused changes in human skin: *in vivo* stratum corneum water content and water evaporation *Hatch, Wilson, Maibach* 583
Morphology
of neps in cotton: effects of mercerization, submercerization, and liquid ammonia on fiber morphology *Cheek, Wilcock, Hsu* 690

Needle Punching
microscopical examination of felting needles: gas and dust filtration batts *Igwe, Smith* 677
Neps
in cotton fabric: effects of mercerization, submercerization, and liquid ammonia on fiber morphology *Cheek, Wilcock, Hsu* 690
in ginned lint, yarn, fabric: influence of growth period on: study of picking dates, locations, and varieties *Mangialardi, Lalor, Bassett, Miravalle* 421
Nonwovens
as insulating materials: measurement of thermal conductivity using a dynamic method *Martin, Lamb* 721
insulating materials: heat transfer characteristics of: comments on *Farnworth* 615
needle-punched fabrics: factor affecting the air resistance: study of 140 fabrics *Atwal* 574
rewetting of: correlation with wet-through resistance profile during liquid flow *Iyengar* 120
SEM studies of jute nonwovens: also coir, goat hair, wool, viscose, polypropylene, and acrylic fibers *Das, Debnath, Ray* 528
sterilization of for medical end uses: effect of gamma radiation: comments on *Iyengar* 184
thermally bonded polyester: rewet of webs *Iyengar, Kwok, Crane* 270

Nylon
chemical discoloration of nylon carpets: recovery and analysis by HPLC of benzoyl peroxide residues on carpet fibers *Caldwell, Perenich* 346
disperse dyes on nylon and polyester: photolytic behavior *Freeman, Hsu* 223
dyeing kinetics of: monochlorotriazinyl dyes *De Giorgi, Cerniani* 563
dynamic and static moduli of: extension due to chain slippage in nylon, viscose, and polyester yarns *Nachane, Hussain* 592
fiber interferograms of: automated digital analysis: also PET, Kevlar and glass fibers *Roche, Rubin, Van Kavelaar* 371
heat set nylon 6 carpet yarns: thermomechanical analysis of stress history *Dennis, Buchanan* 625
marine rope fatigue behavior: wet and dry test data for nylon and polyester ropes *Mandell* 318
perception and control of streaks in: study of streaks in dyed nylon knits to test model *Makansi* 495
physical ageing and annealing in: study of wool and manmade fibers: de-ageing in water *Sukigara, Dhingra, Postle* 479
treated with superheated steam: changes in fine structure and dyeing behavior of nylon 6, 66, and PET fibers *Han, Wakida, Takagishi* 519

Optical Properties
birefringence of polyester fibers: morphological and structural parameters of Egyptian fibers *Hamza, El-Dessouki* 508
luster in jute: also structural features: microscopy and diffractometry studies *Bag, Ray, Das, Mukherjee* .. 611

Orientation
Herman's factor: crystallite orientation distribution profile of x-ray reflection for cotton fibers *Warrier, Munshi, Chidambareswaran* 554
measurements in developing cotton fibers: x-ray angles and optical orientation angles *Hebert, Boylston, Thibodeaux* 742

Permeability
air permeability measurements: moisture induced changes in fabric structure *Wehner, Miller, Rebenfeld* 247
air resistance of nonwovens: study of 140 needle-punched fabrics *Atwal* 574
in-plane fluid flow in fabrics: structure/flow characteristics *Adams, Rebenfeld* 647

Photodegradation
of disperse dyes: photolytic behavior on polyester and nylon substrates *Freeman, Hsu* 223

Polyester
and cotton core yarn: fabrics woven from high tenacity yarn *Harper, Ruppenicker* 147
and cotton slivers: problems and possibilities in monitoring *Lord* 171
and wool blends: viscoelastic properties: physical ageing and annealing in blended textile assemblies *Tao, Sukigara, Postle, Dhingra* 601
appraisal of fabric quality: abrasion resistance, mechanical and aesthetic properties: also cotton and wool *Ukponmwan* 283
cotton-polyester core-yarn fabrics: influence of repeated laundering on air permeability *Harper, Ruppenicker* 674
cotton-polyester-wool triblend: effect of heat on structures with and without flame retardant: SEM study *Goynes, Trask* 549
detergency study: distribution of natural soils on shirt collars: SEM study of cotton and polyester blends *Obendorf, Webb* 557
disperse dyes on polyester and nylon: photolytic behavior *Freeman, Hsu* 223
dynamic and static moduli of: extension due to chain slippage in nylon, viscose, and polyester yarns *Nachane, Hussain* 592
fabric-caused changes in human skin: *in vivo* stratum corneum water content and water evaporation *Hatch, Wilson, Maibach* 583
high temperature dyeing of: role of phenol with disperse dyes *Dhara, Gulrajani* 155
marine rope fatigue behavior: wet and dry test data for nylon and polyester ropes *Mandell* 318
moisture induced changes in fabric structure: air permeability measurements: also cotton, wool *Wehner, Miller, Rebenfeld* 247
morphological and structural properties: birefringence of Egyptian fibers *Hamza, El-Dessouki* 508
open-end spinning of: deposit generation in *Alston* ... 679
physical ageing and annealing in: study of wool and manmade fabrics: de-ageing in water *Sukigara, Dhingra, Postle* 479
soil removal from: comparison of various detergents: distribution of natural residual soils *Webb, Obendorf* 640
temperature adaptable textiles: containing durably bound polyethylene glycols *Vigo, Bruno* 427
thermal nonwovens: rewet of webs *Iyengar, Kwok, Crane* 270

Poly(ethylene Terephthalate)
fiber interferograms of: automated digital analysis: also Kevlar, nylon, and glass fibers *Roche, Rubin, Van Kavelaar* 371
fibers treated with superheated steam: changes in fine structure and dyeing behavior: also nylon 6 and 66 *Han, Wakida, Takagishi* 519
melt spinning of: role of quench air profiles in multifilament melt spinning *Dutta* 13

Proteins
extraction from wool: maximum extraction using thiol-urea solutions *Maclaren* 87

Radioactivity
radioisotope labeling for bacteria: adherence on fabrics *Hsieh, Timm, Merry* 20

Ramie
alkali treated degummed: infrared spectra of *Sao, Mathew, Ray* 407

Rayon
physical ageing and annealing in: study of wool and manmade fabrics: de-ageing in water *Sukigara, Dhingra, Postle* 479

Repellency
and wettability of textile assemblies: apparent contact angle of wax-coated monofilament mesh screen *Kawase, Fujii, Minagawa* 185
and wettability of textile assemblies: apparent contact angle of fresh monofilament mesh screen *Kawase, Fujii, Minagawa* 686

Rope
marine: fatigue behavior of nylon and polyester ropes: wet and dry test data *Mandell* 318

Scanning Electron Microscopy
in a detergency study: distribution of natural soils on shirt collars made from cotton and polyester *Obendorf, Webb* 557

of cotton-polyester-wool triblend: effect of heat on structures with and without flame retardant *Goynes, Trask* 549
of jute nonwovens: also coir, goat hair, wool, viscose, polypropylene, and acrylic fibers *Das, Debnath, Ray* .. 528
quantitative fiber mixture analysis: comments on *Kadikis* 676
studies of wool breakdown by insect larvae: untreated and mothproofed samples *Hammers, Arns, Zahn* 401
Shrinkproofing
of surface whitened wool: improved lightfastness *Levene* 298
Sizing
effect of Classimat faults: evaluation of faults for their performance in weaving *Aggarwal, Hari, Subramanian* 735
shedding of sized yarns on a loom: possible causes *Hall, Mora, Callaway* 614
Sliver
analysis by fibrogram: theoretical study of fiber length *Krowicki, Duckett* 200
jute: an on-line system for controlling weight irregularities *Datta, SenGupta* 617
monitoring of: problems and possibilities in measuring fiber length, crimp, and sliver bulk *Lord* 171
Soil Removal
comparison of laundry detergents: distribution of natural residual soils on facial wipes *Webb, Obendorf* 640
of particulate soils: effect of zeolite on dispersion stability: biologically inactive *Kimura, Komaki, Nakajima* .. 82
Solubility
of disperse dyes on polyester: role of phenol in high temperature dyeing *Dhara, Gulrajani* 155
of wool: maximum extraction of wool proteins by thiol-urea solutions *Maclaren* 87
Sorption
absorption of PAC/AS blend fibers: relation between microporous structure and sequence distribution of AS copolymers *Qin, Liu, Yang, Mao, Li* 433
absorption of reactive dye mixtures: alkaline hydrolysis of *Bhattacharyya* 54
of water by wool: differential scanning calorimetry study *Sakabe, Ito, Miyamoto, Inagaki* 66
of water vapor by wool: effect of dyeing on *Włochowicz, Wojciechowska-Bujok* 503
Spectrometry
of internal lipids in wool: detection of desmosterol using HPLC *Gale, Logan, Rivett* 539
Spectroscopy
Fourier transform infrared photoacoustic: comparison of artificial and natural ageing in cotton *Cardamone, Gould, Gordon* 235
x-ray photoelectron: study of wool treated with aqueous solutions of chromium and copper ions: also electron spin resonance *Carr, Evans, Roberts* 109
Spectrophotometry
infrared spectra of degummed ramie: alkali treated *Sao, Mathew, Ray* 407
of disazo dyes: interaction with polyvinyl pyrrolidone *Sheth, Bhattacharya* 92
Spinning
melt spinning of multifilament PET fibers: role of quench air profiles *Dutta* 13
of new cellulose fibers: experimental approach with N-methylmorpholine-oxide as a solvent *Loubinoux, Chaunis* 61
of spliced yarns: effect of fiber/yarn variables on mechanical properties *Kaushik, Sharma, Hari* 490
open-end: deposit generation in spinning 100% polyester yarn *Alston* 679
Splicing
spliced yarns: performance in warping and weaving *Kaushik, Hari, Sharma, Sarkar* 670
Static Electricity
in human hair: relationship between triboelectric charging and surface modification: polymeric versus monomeric long alkyl chain quaternary ammonium salts *Jachowicz, Garcia, Wis-Surel* 543
Steaming
treating nylon and PET fibers with superheated steam: changes in fine structure and dyeing behavior *Han, Wakida, Takagishi* 519
Streaks
perception and control: model to predict bulk, luster, and dye streaks *Makansi* 463
perception and control: tests of model using nylon knits *Makansi* 495
Surface Properties
and low-stress fabric mechanical properties: precision of measurement of tensile, shear, bending, compression, friction, topography *Mahar, Dhingra, Postle* 357
of human hair: relationship between triboelectric charging and surface modification: polymeric versus monomeric long alkyl chain quaternary ammonium salts *Jachowicz, Garcia, Wis-Surel* 543
wettability: surface scanning of long filaments by a liquid membrane method *Kamath, Dansizer, Hornby, Weigmann* 205
Surfactants
solution transport in wool yarn: nonylphenol poly(ethylene oxide) surfactants: study of carpet yarns *Trounson, McLaughlin* 309

Tenacity
high tenacity yarn: woven fabrics prepared from cotton/polyester core yarn *Harper, Ruppenicker* 147
of cotton fiber bundles: single strand test data *Nachane, Hussain, Krishna Iyer* 122
Tensile Properties
grafting copolymers on cotton yarns: methyl methacrylate and acrylamide using ceric ammonium sulfate as an initiator *Das, Banerjee* 740
length and strength of rapidly conditioned cotton: 14 cottons tested also for moisture content *Brown* 731
of the lockstitch seam: micro software development aids *Laing, Pearshouse* 256
of twisted para-aramid fibers: Kevlar *Hearle, Zhou* .. 7
of wool after carbonizing: a rapid and sensitive method for evaluating damage to *Wang, Pailthorpe* 728
Tension
levels during heat setting: thermomechanical analysis of stress history of nylon 6 carpet yarns *Dennis, Buchanan* 625
of yarns as a function of extension: theoretical approach *Nachane, Krishna Iyer* 279
Testing Apparatus
cotton particulates analyzer: determining dust and trash contents of cottons: evaluation of respirable dust measuring machines and methods *DeLuca* 1
Thermal Analysis
of cotton finishes: thermal response of finishes from methylolamide agents: formaldehyde content and release *Reinhardt, Kottes Andrews* 161
of heat set nylon 6 carpet yarns: thermomechanical analysis of stress history *Dennis, Buchanan* 625
Thermal Conductivity
of nonwoven insulating materials: measurement of thermal conductivity using a dynamic method *Martin, Lamb* 721
Thermal Properties
of heat resistant fabrics: analyzing transient properties in thermal protective performance exposures *Barker, Lee* 331

of 21 heat-resistant fabrics: protective performance in various high intensity heat exposures *Lee, Barker* 123
Thermal Treatments
temperature adaptable textiles: containing durably bound polyethylene glycols *Vigo, Bruno* 427
Tire Materials
twisted para-aramid fibers: tensile properties of Kevlar *Hearle, Zhou* 7
Torsional Properties
torsional damping of wool fibers: effects of humidity, ageing, annealing, and tensile loads *Phillips* 415
Triboelectric Effects
on human hair: relationship between triboelectric charging and surface modification: polymeric versus monomeric long alkyl chain quaternary ammonium salts *Jachowicz, Garcia, Wis-Surel* 543
Twisting
loss and distribution on air-jet looms: influence of filling yarn characteristics on properties of corduroy *Mohamed, Barghash, Barker* 661
of open-end spun cotton yarn: effect of twist factor and stitch length on properties of rib knitted fabrics *Sharma, Gupta, Agarwal, Patnaik* 73
para-aramid fibers: tensile properties of Kevlar *Hearle, Zhou* 7

Viscose
dynamic and static moduli of: extension due to chain slippage in nylon, viscose, and polyester yarns *Nachane, Hussain* 592
Viscosity
of disazo dyes: interaction with polyvinyl pyrrolidone *Sheth, Bhattacharya* 92

Wear
of cotton upholstery fabrics: results of a consumer study *Warfield* 192
Weaving
air-jet loom: mechanics of a single nozzle insertion system: yarn insertion through tubes *Salama, Adanur, Mohamed* 44
let-off mechanisms: effect on fabric formation and dimension of fabric in the loom *Basu* 379
of corduroy on an air-jet loom: influence of filling yarn characteristics on fabric properties *Mohamed, Barghash, Barker* 661
performance of Classimat faults in: evaluation of magnitude of faults and effect of sizing on them *Aggarwal, Hari, Subramanian* 735
shedding of sized yarns on a loom: possible causes *Hall, Mora, Callaway* 614
Wettability
and repellency of textile assemblies: apparent contact angle of wax-coated monofilament mesh screen *Kawase, Fujii, Minagawa* 185
and repellency of textile assemblies: apparent contact angle of fresh monofilament mesh screen *Kawase, Fujii, Minagawa* 686
fabric rewetting: correlation with wet-through resistance profile during liquid flow *Iyengar* 120
of thermally bonded polyester nonwovens: rewet of webs *Iyengar, Kwok, Crane* 270
surface wettability scanning: long filaments: liquid membrane method *Kamath, Dansizer, Hornby, Weigmann* 205
Wicking
of surfactant solution in wool yarn: nonylphenol poly(ethylene oxide) surfactants on wool carpet yarns *Trounson, McLaughlin* 309
Wool Fabrics
ageing during wear: study of trousers: physical ageing and annealing in fibers and textile materials *Mahar, de Jong, Dhingra, Postle* 697
appraisal of quality: abrasion resistance, mechanical and aesthetic properties: also cotton and polyester *Ukponmwan* 283
breakdown by insect larvae: SEM investigations of untreated and mothproofed wools *Hammers, Arns, Zahn* 401
cotton-polyester-wool triblend: effect of heat on structures with and without flame retardant: SEM study *Goynes, Trask* 549
detecting commercially applied agents: pyrolysis gas chromatography to detect insect-resist treatments and yellow dyes *Marmer, Magidman, Carr* 681
measuring low-stress mechanical and surface properties: precision of measurement of tensile, shear, bending, compression, friction, topography *Mahar, Dhingra, Postle* 357
moisture induced changes in structure: air permeability measurements: also cotton, polyester *Wehner, Miller, Rebenfeld* 247
physical ageing and annealing in: also manmade fabrics: de-ageing in water *Sukigara, Dhingra, Postle* 479
sorption of water vapor by: effect of dyeing on *Włochowicz, Wojciechowska-Bujok* 503
surface whitened, shrink resistant: improved lightfastness *Levene* 298
temperature adaptable textiles: containing durably bound polyethylene glycols *Vigo, Bruno* 427
treated with sulfamic acid as a dye resist: measurements of yellowness and strength *Cameron, Pailthorpe* ... 619
wool/cotton blends: improving wrinkle recovery by simultaneous treatment with Synthappret BAP and DMDHEU *Rippon* 655
wrinkling properties of: studies at low humidities *Leeder, Shishoo* 430
Wool Fibers
carbonization of: critical concentration of sulfuric acid and its effect on wool *Zhao, Pailthorpe* 39
carbonization of: surface barrier effects in rapidly carbonized wool *Zhao, Pailthorpe* 579
damage to during carbonizing: a rapid and sensitive method for evaluating *Wang, Pailthorpe* 728
dark fiber concentration in top: decision schemes for assessing: mathematical analyses *Turner, Foulds* .. 710
detection of desmosterol in: study of internal lipids by HPLC *Gale, Logan, Rivett* 539
physical ageing and annealing of: single wool fibers and textile assemblies *Tao, Postle* 387
physical ageing and annealing in wool blends: effects on stress relaxation behavior: viscoelastic properties *Tao, Sukigara, Postle, Dhingra* 601
protein extraction from: maximum extraction using thiol-urea solutions *Maclaren* 87
quantitative fiber mixture analysis: SEM study: comments on *Kadikis* 676
rapid carbonizing of: effects of time delay *Zhao, Pailthorpe* 523
states of water sorbed by wool: differential scanning calorimetry study *Sakabe, Ito, Miyamoto, Inagaki* ... 66
superfine Merino: fine structure of: also cashmere *Tester* 213
surfactant solution transport in: nonylphenol poly(ethylene oxide) surfactants: study of carpet yarns *Trounson, McLaughlin* 309
torsional damping of: effects of humidity, ageing, annealing and tensile loads *Phillips* 415
x-ray photoelectron and electron spin resonance study: wool

treated with aqueous solutions of chromium and copper ions *Carr, Evans, Roberts* 109
Wrinkle Recovery
of wool/cotton blends: improving by simultaneous treatment with Synthappret BAP and DMDHEU *Rippon* 655
Wrinkling Properties
of wool fabrics: studies at low humidities *Leeder, Shishoo* 430

X-Ray Techniques
photoelectron and electron spin resonance: study of wool treated with aqueous solutions of chromium and copper ions *Carr, Evans, Roberts* 109

Yarns
abrasion resistance of ring and rotor spun yarns: relation to their coefficient of friction *Subramanian, Nalankilli, Mathivanan, Jaganathan* 369
bundle strength: single strand test data *Nachane, Hussain, Krishna Iyer* 122
cotton/polyester core yarns: woven fabrics prepared from high tenacity yarn *Harper, Ruppenicker* 147
knitted on a sinker top machine: mechanism of loop formation at extreme cam settings: relationship between count, gauge, and tightness factor *Banerjee, Alaiban* 513
knitted on a sinker top machine: mechanism of loop formation at extreme cam settings: theoretical analysis of limiting conditions *Banerjee, Alaiban* 568
mechanical properties of spliced yarns: effect of fiber/yarn variables *Kaushik, Sharma, Hari* 490
static and kinetic friction of: a method for measuring *Kalyanaraman, Prakasam* 307
tension as a function of extension: theoretical approach *Nachane, Krishna Iyer* 279
wet and dry spliced: performance in warping and weaving *Kaushik, Hari, Sharma, Sarkar* 670
Yellowness
of wool treated with sulfamic acid: dye-resist treatment: strength also measured *Cameron, Pailthorpe* 619
